Career Objective

Highly motivated DevOps & Cloud Engineer with expertise in multi-cloud infrastructure (AWS), Kubernetes orchestration, and Infrastructure as Code. Skilled in building automated CI/CD pipelines, configuration management, and enterprise-grade observability. Seeking an opportunity to deliver cost-efficient, high-availability, and secure cloud-native systems.

Technical Skills

- **Cloud Platforms:** AWS (EC2, VPC, IAM, ALB, ASG, RDS, Route 53, CloudFront, Lambda, WAF), GCP (Learning / Basic), Microsoft Azure (Learning / Basic)
- **IaC & Config Mgmt:** Terraform, OpenTofu, AWS CloudFormation, Ansible, Infrastructure as Code (IaC) best practices
- **Kubernetes & Orchestration:** Kubernetes (K8s), EKS, Ingress, RBAC, IRSA, Helm, ArgoCD, Canary & Blue-Green Deployments
- **DevOps & CI/CD:** Jenkins, GitHub Actions, GitLab CI/CD, Docker, Docker Compose, Git, Linux System Administration
- **Monitoring & Observability:** Prometheus, Grafana, ELK Stack, CloudWatch, CloudTrail, Dynatrace, PagerDuty, SNS
- **Scripting & Automation:** Python, Bash, automated backup & operational task scripting, disaster recovery automation
- **Databases:** MongoDB, MySQL, PostgreSQL, Redis

Education

- **B.Tech in Computer Science** 2021 – 2025
Sardar Beant Singh State University (SBSSU), Gurdaspur, Punjab, India

Certifications

- AWS Academy Graduate - Cloud Foundations (Processing)
- Multi-Cloud with DevOps (Processing)

Internships

- **DevOps & Cloud Engineer – Naresh I Technologies** Nov 2025 – Present
 - Design & develop production-grade AWS infrastructure using Terraform and CloudFormation.
 - Architected and deployed EKS clusters using Helm for robust package management and monitoring.
 - Implemented CI/CD pipelines via Jenkins and GitHub Actions for continuous automated software delivery.
 - Enforced granular security protocols: configured Kubernetes RBAC and utilized IRSA for secure connectivity.
 - Orchestrated zero-downtime updates using Canary and Blue-Green deployment strategies.

- **MERN Web Development Intern – Ducat India** Jan 2025 – Aug 2025
 - Engineered scalable features for real-time MERN applications, focusing on backend API efficiency.
 - Managed version control workflows and resolved merge conflicts within collaborative environments using Git.

Projects

- Kubernetes-Native Cloud Orchestration & Observability Platform**
Tech Stack: Kubernetes (EKS), Helm, Prometheus, Grafana, ELK, RBAC
Architected **EKS infrastructure** for high concurrency. Implemented **Advanced Security Models** with Kubernetes RBAC and Pod IRSA for secure, isolated S3 access. Configured **Kubernetes Probes** for health checking and resource management (Limits and Requests) to prevent cluster outages. Leveraged **PVCs** for DB-type pods and automated snapshot-based backups to ensure **data persistence and disaster recovery**.
- AWS End-to-End Scalable Deployment**
Tech Stack: Terraform, OpenTofu, CloudFormation, AWS, ASG, WAF
Architected scalable infrastructure via **Terraform, OpenTofu, and CloudFormation**, integrating **Auto Scaling Groups** and load-balanced architectures to handle high-concurrency workloads. Implemented persistent security layers including **WAF, Security Groups, and ALB configuration** to protect against vulnerabilities, aligned with secure DevOps practices.
- Automated CI/CD DevOps Orchestration**
Tech Stack: Jenkins, GitLab CI/CD, Python, Bash
Developed **enterprise-level automated pipelines** using Jenkins and GitLab CI/CD, enabling **seamless, zero-downtime deployments**. Synthesized infrastructure provisioning and monitoring with **Python/Bash automation scripts**, ensuring all resources are **fully observable, compliant, and reliable**.
