CAREER OBJECTIVE

Highly motivated DevOps & Cloud Engineer with expertise in multi-cloud infrastructure (AWS), Kubernetes orchestration, and Infrastructure as Code. Skilled in building automated CI/CD pipelines and enterprise-grade observability. Seeking an opportunity to deliver cost-efficient, high-availability, and secure cloud-native systems.

TECHNICAL SKILLS

- **Cloud Platforms:** AWS (EC2, VPC, IAM, ALB, ASG, RDS, Route 53, CloudFront, Lambda, WAF), GCP, Azure
- **IaC & Config Mgmt:** Terraform, OpenTofu, AWS CloudFormation, Ansible, IaC best practices
- **Kubernetes & Orchestration:** Kubernetes (K8s), EKS, Ingress, RBAC, IRSA, Helm, ArgoCD, Canary & Blue-Green
- **DevOps & CI/CD:** Jenkins, GitHub Actions, GitLab CI/CD, Docker, Docker Compose, Git, Linux System Administration
- **Monitoring & Observability:** Prometheus, Grafana, ELK Stack, CloudWatch, CloudTrail, Dynatrace, PagerDuty
- **Databases:** MongoDB, MySQL, Redis

EDUCATION

B.Tech in Computer Science

2021 – 2025

Sardar Beant Singh State University (SBSSU), Gurdaspur, Punjab, India

CERTIFICATIONS

- AWS Academy Graduate - Cloud Foundations
- AWS with DevOps (Certified Professional Training)

INTERNSHIPS & TRAINING

DevOps & Cloud Engineer Training and Internship – Naresh I Technologies

Nov 2025 – Present

- Design & develop production-grade AWS infrastructure using Terraform and CloudFormation.
- Architected and deployed EKS clusters using Helm for robust package management and monitoring.
- Implemented CI/CD pipelines via Jenkins and GitHub Actions for continuous automated software delivery.
- Enforced granular security protocols: configured Kubernetes RBAC and utilized IRSA for secure connectivity.
- Orchestrated zero-downtime updates using Canary and Blue-Green deployment strategies.

MERN Web Development Training and Internship – Ducat India

Jan 2025 – Aug 2025

- Engineered scalable features for real-time MERN applications, focusing on backend API efficiency.
- Managed version control workflows and resolved merge conflicts within collaborative environments using Git.

PROJECTS

1. Infrastructure as Code (IaC) Using Terraform on AWS

Tech Stack: Terraform, AWS (EC2, VPC, S3), OpenTofu, CloudFormation

Automated the provisioning of highly available AWS infrastructure including VPCs, subnets, and security groups. Utilized Terraform state management and modules to ensure consistent environmental deployments, reducing manual setup time by 90%.

2. Automated Application Deployment Using GitHub Actions and Docker

Tech Stack: GitHub Actions, Docker, Docker Hub, AWS EC2

Designed a continuous deployment workflow that containerizes applications upon code push. Integrated automated image building and pushing to Docker Hub, followed by seamless deployment to staging environments on AWS EC2.

3. End-to-End CI/CD Pipeline for a Containerized Application Using Jenkins, Docker, Kubernetes, and AWS EC2

Tech Stack: Jenkins, Kubernetes (EKS), Docker, AWS EC2, Helm

Developed a robust CI/CD pipeline leveraging Jenkins for build automation and EKS for production-grade orchestration. Implemented Helm charts for package management and ensured zero-downtime deployments via Kubernetes rolling updates.
